- No social audit policy to monitor the social practices of suppliers and service providers
- No measurement of supplier satisfaction
- No quality certification process (e.g. ISO 9001)
- No formal commitment to fiscal responsibility

The purpose of this document is to provide a synthetic view of the company's maturity on all the generic CSR matters applicable to its macro sector of activity (Services, Industry or Distribution). It is based on a review of a questionnaire filled in by the company on information relating to the year N-1. The consistency of the responses and their compliance with the scoring framework is assessed by an ESG analyst. The overall score and the thematic scores result from all the criteria considered by the evaluation matrix.

For comparability purposes, the questionnaire developed by Ethifinance has not been specifically adapted to the company. The analysis of the proposed answers is based on declarative information engaging the responsibility of the company being evaluated. The information provided is not subject to an audit. The proposed analysis cannot therefore guarantee that the information is correctly applied in the company's day-to-day practices.

The search for controversies of serious importance is based on public data of less than two years. Ethifinance cannot be held responsible for the sincerity of the proposed assessment if information is published after the date of this document.
